Professional Summary

Computer Science undergraduate with hands-on experience in Python, machine learning, and Android application development. Skilled in building AI-driven applications, implementing computer vision models, and developing accessible user interfaces. Strong interest in software engineering and applied AI, with a focus on transforming technical concepts into practical solutions.

Education

Babu Banarasi Das University — Lucknow, Uttar Pradesh
B.Tech. in Computer Science | CGPA: 8.5/10 — *Expected June 2027*

Projects

Kavach – Voice-Activated Women's Safety Alert System — *May 2025 – Present*
Java | XML | Android Studio | SpeechRecognizer API

- Designed a high-contrast, accessibility-focused Android interface using XML layouts with an easily reachable SOS action for emergency situations.
- Developed core application functionality in Java, including background services and application lifecycle management.
- Integrated Android's SpeechRecognizer API to monitor voice input for predefined emergency trigger words such as "Help" and "Kavach".

Plant Disease Detector – AI-Powered Android Application — *Feb 2024 – Present*
Java | XML | Android Studio | TensorFlow Lite | CNN

- Built an AI-powered Android application capable of identifying **15+ plant diseases** from leaf images using a CNN-based classification model.
- Integrated a TensorFlow Lite model to enable lightweight, on-device image classification within the Android application.
- Achieved approximately **95% classification accuracy** during model evaluation.
- Developed an intuitive Java and XML workflow for image-based plant disease identification and prediction.

Technical Skills

Programming	Python, SQL
Web Technologies	HTML, CSS, JavaScript
Machine Learning	Pandas, NumPy, Matplotlib, Seaborn, TensorFlow Lite, CNN
Android Development	Java, XML, Android Studio
Developer Tools	GitHub, Jupyter Notebook, Google Colab, MySQL Workbench

Certifications & Activities

- **Data Visualization Using Python** – Certification
- Participated in **Tech-Expo**, contributing to technology-driven projects and exploring practical software solutions.
